Benzoin *(Styrax tonkinesis)*
Benzoin has a pronounced effect on congestion; almost ‘melts away blockages. Strong mucolytic and expectorant. Stimulating to circulation, particularly the tiny capillaries that feed the skin. Is often used as a fixative to stabilize the aroma in blended oils and perfumes.
Ingredient In: LeDreams, LeEverlasting,
Therapeutic Properties: anti-spasmodic, antidepressant, calmative, aphrodisiac
Application: Appropriate areas on feet, directly on skin, chest or other area of concern, diffused
Aromatic: slightly woody with a strong vanilla scent; for recovery from extreme life stress or depression
